Design Pattern MVC in ABAP

Restauring ALV demo programs to ABAP-OO

Marcus Wolffson

- **MVC** Model View Controller
- **Model** - The data level (Read, Write)
- **View** - The output (Screen, Printer, ..)
- **Controller** – The program code, that runs interaction between Model and View.
Responsible for the behaviour of the program.

- **SALV_DEMO_TABLE_SIMPLE**
Demonstration of Simplest ALV OM Call
- **SALV_DEMO_TABLE_POPUP**
Demonstration of Dialog Box Display for ALV OM (Used as an MVC example)
- **SALV_DEMO_TABLE_COLUMNS**
Demonstration of Column Settings
- and many more ...

UML of the new Popup classes
