Who we are

AD_ventas_
Consulting

Our vision at ADventas is to sustainably improve the world and the lives of people.

Therefore, we are focusing on the worldwide trade of raw materials and consumer products, as well as the characteristics of their material planning, calculation and processing.

As industry standards, our best-practice processes as defined for this area help companies digitalize and sustainably improve the disposition of goods and calculation of their trades, as well as their execution.

We are the leading SAP partner company in Global Trade Management (GTM).

ADventas
Consulting

Some ADventas customers who use GTM.

- Weber & Schaer
  (Germany - Rubber)

- Krahn Chemie
  (Germany - Chemical Products)

- Stern Chemie
  (Germany – Food Chemistry)

- Landgard
  (Germany – Flowers & Plants)

- OGL Foodtrade
  (Italy – Fruits & Vegetables)

- Meraxis AG
  (Switzerland - Polymers)

- Wilfried Heinzel
  (Austria – Pulp & Paper)

- Ronald A. Chisholm
  (Canada – Meat & Diary)

Why we model our own Best Practice Processes

ADventas
Consulting

Fit-to-Standard – But what, if there is no Standard?

- SAP Activate Method is based on SAP Best Practice Processes. In Fit-to-Standard workshops the Best Practice Processes are presented, and gaps are identified.

- For SAP S/4HANA 2023 543 best practice processes are delivered

- They do not cover all the S/4HANA functionalities

- Especially the processes for Global Trade Management (GTM) are missing

ADventas
Consulting

ADventas GTM Activate complements the SAP Activate method with regards to GTM.

- GTM Best Practice processes are not those that are delivered in the SAP standard, but those that have proven themselves in practice.
- ADventas GTM Activate complements the SAP Activate method with process descriptions, customizing and software that are necessary for a fast and reliable implementation of SAP Global Trade Management
- Required processes can be adapted to the customer's requirements.
- Processes that are not needed can be activated later in the event of business expansion e.g., due to acquisitions.
- With the ADventas GTM Best Practice Add-on you reduce implementation time and effort.

How we solve it with ALM tools

ADventas
Consulting

We use three different Tools to model and maintain our Best Practice Processes.

ADventas
Consulting
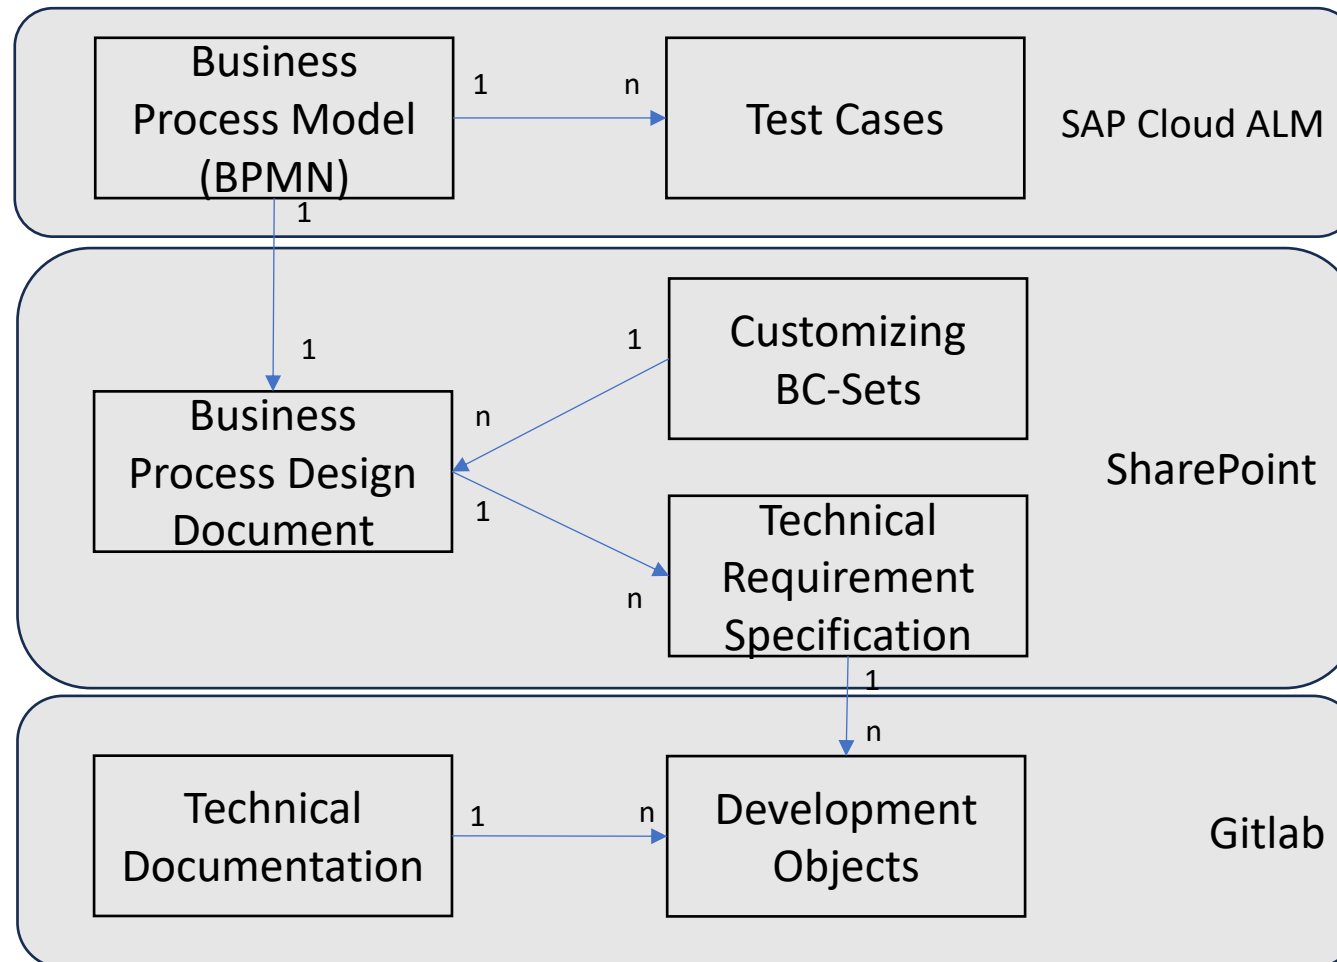

In Solution Manager the Process Hierarchy was in Focus

In SAP Cloud ALM the Prosses (Scope Item) is in Focus.

Why have we decided to use SAP Cloud ALM

SAP Cloud ALM less complex and cheaper in operations than Solution Manager

Solution Manager

- No License Costs

- Hosting Costs

- Upgrade Costs

SAP Cloud ALM

No License Cost

No Hosting Costs for small usage

No Upgrade Costs

No License Costs for a small usage of Tricentis test automation

ADventas
Consulting
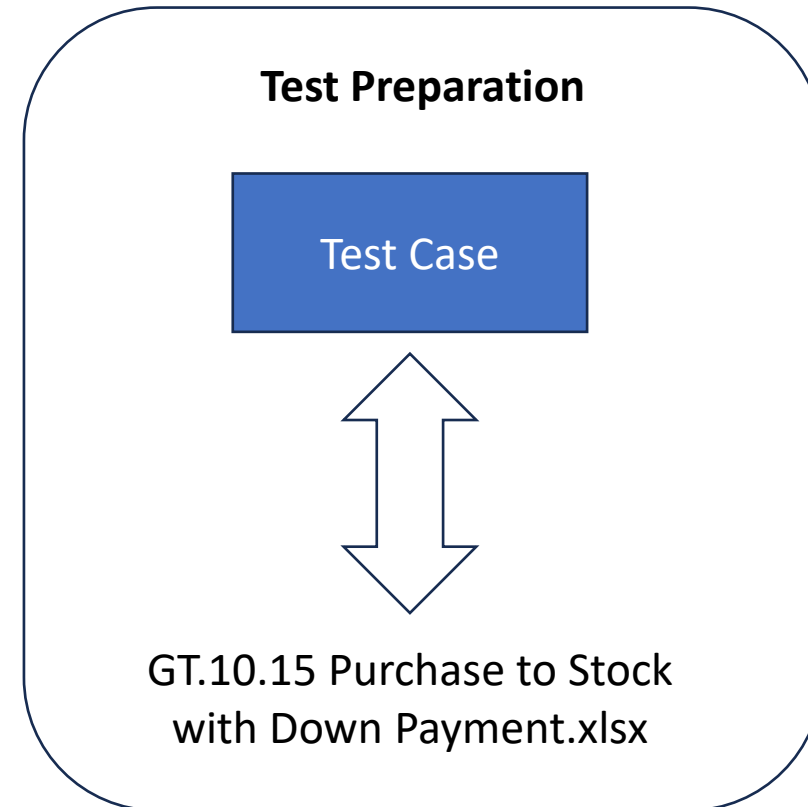

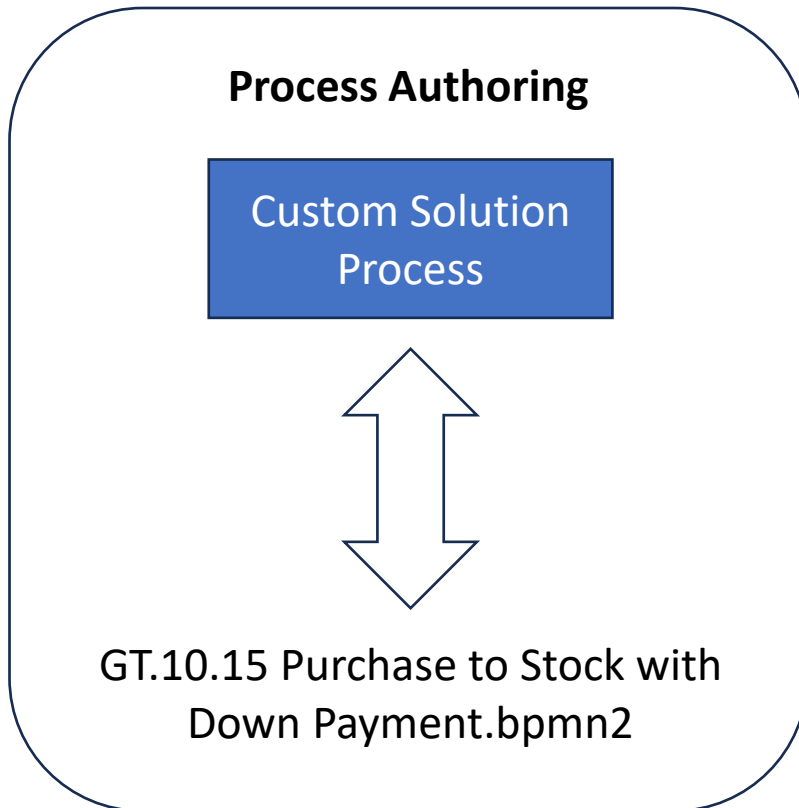

Which parts of SAP Cloud ALM are we using

ADventas
Consulting

We are using the tools to model and test our business processes.

ADventas
Consulting

How we are delivering SAP Cloud ALM content to the customer

ADveﬔas
Consulting

The content is delivered via download upload to the customer.
